PERSONAL PROJECTS

Blogging Website

- As a web developer, I designed and implemented a dynamic blogging website using PHP Laravel. This project highlights my expertise in backend development, database design, and responsive web design. It demonstrates my ability to create user-friendly platforms with a focus on high-quality, scalable solutions.

TravelMate-Mobile Application

- As an Android developer, I designed and implemented the TravelMate application using Java as the primary language. This project demonstrates my proficiency in mobile app development, incorporating Google Maps API for navigation, AccuWeather API for weather information, and Uber API for transportation integration. Leveraging Firebase as the database, the TravelMate app provides users with a seamless travel planning experience, combining efficient coding practices with the integration of key external APIs.
